DON, I HAVE JUST A FEW COMMENTS/QUESTIONS ON THE LNAPL RECOVERY
PLAN FOR NADEP AREA. THEY ARE AS FOLLOW:

PAGE 2-9, 4TH PARA: Correct "...but screen doe's not fully..." to "...but screen does not
fully..."

GENERAL COMMENT (Regarding Section 2.5): Have trends (i.e. seasonal, affects from
precipitation...) ever been evaluated for the site? Has Rachel Johnson (EAD, MCAS Cherry Point
(919 466-4421)) ever been consulted for past free product recovery data? If not, suggest that
past recovery data be evaluated and trends identified, if any.

GENERAL COMMENT (Regarding Section 3.3): Has a data/database management system been
designed? Suggest that the database be consistant with current IRP GIS standard; also, suggest
that the data be associated with location within GIS for ease of management.

GENERAL COMMENT (Regarding Section 3.4): Who is to operate and maintain the recovery
system? Assuming B&RE or OHM, for how long?

THANKS DON. HOPE TO SEE YOU SOON. REGARDS, RENEE
